

# **A SUSTAINABLE FUTURE FOR ROOM-IN-THE-ROOF**

THE SIMPLE WAY TO ADD SOLAR PANELS

## WHY SOLAR PANELS?

As part of the transition to a low carbon economy, we want to help create homes that enable homeowners to live sustainably. In addition to the use of high performance insulation to deliver excellent thermal performance, the use of renewable energy will be a key element in the decarbonisation of housing. We have partnered with UPOWA to incorporate solar panel preparation in our room-in-roof installations. This means solar panels can be installed at the same time as the roof - so you can focus on completing an even quicker build.

## WHY CHOOSE UPOWA?

Already well established in the industry, UPOWA Inline Solar offers a cost effective, fully compliant, sleek integrated solar system. Their high quality products match the standards we provide to our customers and the technical expertise from both businesses covers every aspect of the design and planning.

**Supporting our customers to meet future building regulations.**
